# Southern Heat Exchanger Services - SHECO Services

Southern Heat Exchanger Services (SHECO Services) is a subsidiary of Southern Heat Exchanger Corporation (SHECO) of Tuscaloosa, Alabama. Initially established in 2003 to meet the growing service and repair needs of the heat exchanger industry, SHECO services quickly established a loyal customer base with its experience and responsiveness. Today SHECO Services does a lot more than just service and repairs, early on SHECO Services began building new Shell and Tube Heat Exchangers as well as Air Coolers for customers across a wide range of industries and today covers the spectrum in both categories.

The shop is equipped to handle work of virtually any size and type, from pipe size shell and tube units to feedwater heaters to fin fan units, SHECO Services has built and successfully repaired them all. Equipped with a horizontal cut-off saw with an 84" throat, 100,000 pounds of in-house lift capacity and all the machining, welding and support equipment it needs, SHECO Services can build or repair virtually any heat exchanger. Its staff has over 200 years of combined heat exchanger design, manufacturing and repair experience. In addition they have the full support of their parent Southern Heat Exchanger in Tuscaloosa, with its' 2 plants, engineering staff and 50 plus years in the heat exchanger business.

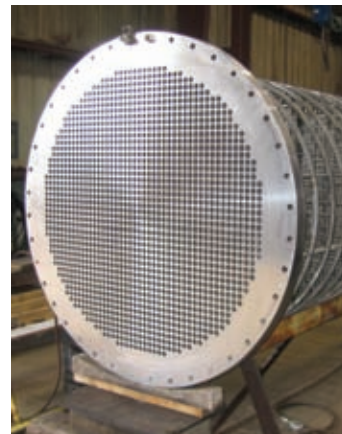

Our strength lies in our focus, our experience and our people. Since its inception SHECO Services has focused exclusively on Heat Exchangers and Heat Exchanger repairs.

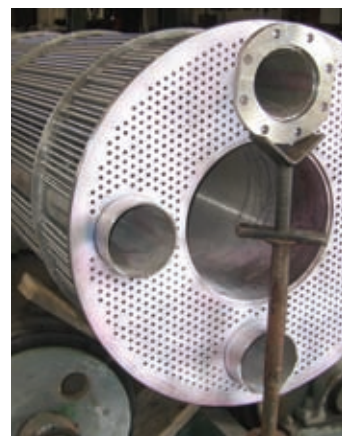

# Southern Heat Exchanger Services - SHECO Services

SHECO Services was established with experienced people right from the start. Today we are proud to say we have some of the most knowledgeable people in the industry in all facets of the operation. From sales to engineering and operations to the shop floor, customers can count on people who know how to do things right and have the talent to do so. This experience level and knowledge base has allowed SHECO Services to establish a reputation as a company who is at its best the more difficult and more unusual the job is. We build new exchangers of all shapes and sizes, utilizing materials from carbon steel to alloys and metallurgies of virtually all types.

New exchangers and shop repairs are only part of what SHECO Services does well, where their team really shines is in the field. From jobs as small as re-rolling a few tubes to major heat exchanger repairs and re-tubing anywhere in the world, the SHECO Services team can handle any heat exchanger repair challenge. From the beginning SHECO Services has won over customers with its ability to quickly breakdown job requirements, mobilize at a moments notice and successfully complete repairs of all sizes and types anywhere in the world. No job is too big or too small. Experience first hand the difference between the service SHECO Services can provide and the service you have been getting – give us a call and put us the test.

No job is too big or too small. SHECO Services has the equipment and engineering expertise to manufacture or repair heat exchangers from 5" in diameter to 150" in diameter.

We have the right people to repair virtually any heat exchanger, in the field or in one of our shops, 24 hours a day 7 days a week.

Air coolers and fin fans are another one of our strengths. Everything from new bundles to shop repairs to field repairs.
